Classroom Strategies for Interactive Learning, 4th Edition

Educators across content areas have turned to Classroom Strategies for Interactive Learning for almost two decades. This fully updated fourth edition delivers rich, practical, research-based strategies that readers have found invaluable in the context of today's classrooms. Doug has written all-new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following: Understand the research base for comprehension strategies in content classrooms Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge Show learners how to question a text Teach reading and thinking through a disciplinary lens At the heart of this edition are more than forty classroom strategies, with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking/listening, and language standards.

Level 3 Health and Social Care Diploma Evidence Guide

This book is primarily written for students of nursing and is relevant to all branches of Project 2000. The book covers some of the key issues in public health and epidemiology which are relevant to nursing. The chapters are written in a study guide format, and each poses a series of questions and exercises which the reader is encouraged to think about and work through. The aim is to introduce the reader to some of the key concepts in public health and epidemiology in a way which stimulates them to think through many of the issues for themselves. It is hoped that An Introductory Study guide to Public Health and Epidemiology will prove a useful resource to nursing students, tutors, and to qualified nurses entering the areas of community and public health.
